Second-year Software Engineering and Management student at the University of Gothenburg seeking a summer internship, with a long-term goal of working in robotics and systems engineering.

EXPERIENCE

Gothenburg University, Gothenburg — *Teaching Assistant*

MONTH 2026 - PRESENT

- Supporting around 100 students across Fundamentals of Programming, Object-Oriented Programming, Requirements Engineering and Systems Development.

PROJECTS

Booooth— *Next.js, React, Tailwind CSS, Supabase* · Live site · Code

- Team project: a browser-based photo booth with an opening curtain, a 3-2-1 countdown, a four-shot photo strip, and a choice of filters, frames and themed designs. Users can download their strip and pin it to a shared map. Supabase handles authentication, storage and the database. Built with AI-assisted development using Claude, a new way of working for me.

Frog Hopper—*Python, Pygame, Arduino, MQTT* · Demo video

- Developed a game with Arduino and MQTT integration for interactive control, in a team working in sprints. Worked on project structure, gameplay logic, user interaction and technical documentation, with continuous debugging and iteration.

Youtube Homepage clone— *HTML, CSS* · Code

- Recreated the desktop YouTube homepage, with features, using Flexbox and CSS Grid. Added my own design choices: dark-mode, icons, layouts

EDUCATION

University of Gothenburg, Gothenburg, Sweden— *BSc Software Engineering and Management*

SEPTEMBER 2025 - JUNE 2028

International School of the Stockholm Region, Stockholm, Sweden — *International Baccalaureate (IB) Diploma*

AUGUST 2023 - JUNE 2025

SKILLS

Programming: Python, Java, Go, HTML, CSS, Javascript

Frameworks: Git, GitHub, Arduino + MQTT (basic)

Ways of working: Agile, Technical documentation

Personal: Problem-solving, organisation, time management, attention to detail

LANGUAGES

English (Fluent)

Akan (Fluent)

French (B1)

Swedish (B1-B2)

VOLUNTEERING

Gothenburg Fringe Festival

Erikshjälpen second hand store
