EDUCATION

BsC Software Engineering & Management

Gothenburg University
2025- Expected 2028

Relevant coursework:

Software Architecture,
Distributed Systems, Data
Structures and Algorithms,
Programming Fundamentals

SKILLS

Python · HTML/CSS · Git · VS Code

Organisation · Time
management · Detail-oriented

LANGUAGES

- English- Fluent
- Swedish- B1-B2
- French- B1

VOLUNTEER

- Erikshjälpen Second Hand
- Gothenburg Fringe Festival
- Stockholm Film Festival

PROFILE

Software Engineering and Management student at the University of Gothenburg, passionate about software development, robotics, and systems engineering. Experienced in programming education and web projects, with a drive to build practical solutions, collaborate, and grow as an engineer.

WORK EXPERIENCE

Teaching Assistant - Univeristy of Gothenburg

Course- Programming Fundamentals

2026- Present

- Support students during programming laboratory sessions, helping them understand programming concepts and troubleshoot implementation issues.
- Explain topics such as input handling, strings, and output formatting in a clear and accessible way.
- Assist with lab-related questions and encourage students to develop independent problem-solving skills.

SOME PROJECTS

Youtube Homepge Clone

HTML · CSS

- Recreated a responsive video-platform homepage to practise layout, styling, and component-like page organization.
- Implemented a dark-mode interface and structured the page using reusable visual patterns.

Frog Hopper- Python/PyGame Project

MQTT · Python · Pygame

- Developed a Python/Pygame game with Arduino and MQTT integration for interactive control features.
- Implemented gameplay logic, user interaction, and project structure while contributing to debugging and iterative improvements.
- Collaborated in sprints and maintained technical documentation throughout development.
